

STOMP BLOX RISER MODULAR PEDALBOARD RISER

The Stompblox Riser is a modular pedalboard riser that allows you to elevate portions of your Stompblox pedalboard for easier access to effect pedals. The Riser can snap into multiple positions on the Stompblox pedalboard giving you total control over your pedalboard layout.

FEATURES

- Raise sections of your pedalboard
- Pass throughs for cables
- Simple snap-in attachment
- Easy to remove and reposition
- Fits in 6 locations on Stompblox
- Works with Stompblox Extend

INSTRUCTIONS

Stompblox Risers can be installed in either the back or front rows of your Stompblox.

- At a slight angle, insert the single tabbed edge (*figure A*) of the Riser into the desired pass through on the back or front row of the Stompblox, left, center, or right.
- Position the Riser so that it is gently resting on the Stompblox face.
- Press the two tabbed riser face (*figure B*) so that the tabs clear the surface and lock into the anchor slots under the pass through.

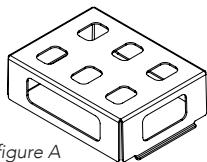

figure A

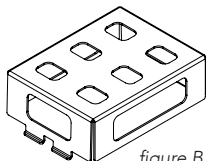

figure B

TIPS

- Use 3 Risers to raise the entire back row of a Stompblox pedalboard
- Use 1 Riser in the front of your Stompblox to raise effects near high profile pedals

MORE FROM STOMP BLOX

STOMP BLOX MODULAR PEDALBOARD

You probably already have a Stompblox or two. Adding more Stompblox to your rig makes it easy to play large gigs, small gigs, practices, recitals, etc. Just take the Stompblox you need or have room for and go!

STOMP BLOX EXTEND

Extend attaches to the back of any Stompblox for a little extra space when you need it or to mount your power supply, DI, loop controller, etc.
